Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This is in response to amendment filed on 3/10/04 in which claims 1-5 are pending. The applicant's amendments have been fully considered but they are moot based on the new ground of rejection. Therefore, this case is made final.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Oh U.S. patent No 5,960,011.

As per claims 1 and 5 Oh, teaches a method for normalizing metric values in a decoder uses a plurality of metric values of a next state said each metric value having at least a survival path metric and a competition path metric value, the method comprising the steps of: detecting the survival path metric values out of the metric values (see col.4, lines 12-22 and col.5, lines 17-30); detecting a minimum survival path metric value out of the detected survival path metric values (see col.3, lines 45-60 and col.4, lines 1-20); determining whether the detected minimum survival path metric value exceeds a threshold value (see col.4, lines 1-20 and col.5, lines 5-30); subtracting, when the detected minimum survival path metric value exceeds a threshold value, the detected minimum survival path metric value from the detected survival path metric values to output normalized metric values (see col.8, lines 15-25).

As per claims 2-4, Oh teaches a device for normalizing metric values in a decoder uses a plurality of metric values of a next state said each metric value having at least a survival path metric and a competition path metric value, the device comprising the steps of: comparator for detecting the survival path metric values out of the metric values (see 124 element) for detecting a minimum survival path metric value out of the detected survival path metric value(see col.4, lines 12-22 and col.5, lines 17-30), and outputting determining the minimum survival path metric value when the detected minimum survival path metric value exceeds a threshold value ((see col.3, lines 45-60 and col.4, lines 1-20); subtracting the minimum survival path metric value from the metric values to output normalized metric values (see col.8, lines 15-25).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
